-----

Save on your electricity bill by adding our solar roof vent. Our product harnesses the power of the sun to provide an energy-efficient solution to your home container or office container ...

We run detailed duct bank studies that ensure your underground cable systems are engineered for real world thermal loads, code compliance and construction success.

Channing and William install a Solar Powered Roof Vent that is adapted to fit the roof corrugations of a sea can called the Big Air 400 CFM Solar Roof Vent from Container Modification...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Tools for design of solar systems using air as the heat transfer media. Tools for sizing ducts and fans. Pipe flow pressure drop calculator. "Solar ...

The custom-designed aluminum framing kit allows the BigAir 57 CFM ...

The aim of this paper is to present a design tool with its guiding principles for energy conversion and noise characterization of an exterior rectangular duct often installed on ...

Tools for design of solar systems using air as the heat transfer media. Tools for sizing ducts and fans. Pipe flow pressure drop calculator. "Solar Suppliers" some provide extensive technical ...

The custom-designed aluminum framing kit allows the BigAir 57 CFM Solar Vent to be installed anywhere on shipping container sidewalls, end walls, or doors - from floor to ceiling. Eliminate ...
