SRP is seeking a non-lithium-ion, non-inverter based LDES technology as a pilot at its coal-fired Coronado Generating Station (CGS) in St. Johns, Arizona.

JEA will seek to hit that carbon-free target by using electricity from the Plant Vogtle nuclear plant in Georgia and expanding its use of solar power.

Overseen by architecture firm Kezlo Group and installed by Solar Energy Services, a Johnnie-led local energy company, the array is slated for completion in 2026.
