---

SPC's unique chemical lithium structure is based on EVE's own patents. The hermetically closed and sealed enclosure with safety valves makes the design superior safe even in applications ...

High-energy pulsed power systems depend on capacitor performance for reliability, efficiency, and control. Learn how to specify ...

There are several unique challenges when we attempt to use supercapacitors in a backup solution. In this application note we present a collection of challenges and a set of ...

The SPC1550 Super Pulse Battery Capacitor has been proven to meet the tests and Criteria requirements of UN Manual, Part III, subsection 38.3 (Document No.: ST/SG/AC.10/11/Rev 5 ...

roven Pulse Power Capacitor Technology Knowles offers unparalleled expertise through their Cornell Dubilier brand in the design and manufacture of custom pulse power capacitors for life ...

During the pulse, the system voltage will drop below the lower voltage allowed by the device's electronics and the system will shut down. For these applications, new low ESR ...

In order to improve the power density of the power system and provide power to various loads in a timely and efficient manner, it is particularly necessary to use ...

Learn how to specify capacitors for high-energy pulse applications. Discover the crucial factors that influence capacitor ...

Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance than traditional capacitors. They deliver rapid, reliable ...

Learn how to specify capacitors for high-energy pulse applications. Discover the crucial factors that influence capacitor performance and reliability in this informative blog post.

High-energy pulsed power systems depend on capacitor performance for reliability, efficiency, and control. Learn how to specify and design for success.

The low ESR BestCap is a perfect fit in applications where the energy source is a primary rechargeable battery and large pulse power requirements are needed. They provide high ...
