Using the code below for svm in python: `from sklearn import datasets from sklearn.multiclass import OneVsRestClassifier from sklearn.svm import SVC iris = ...`

3 They probably have a bit complicated mathematical relation. But if you use the `decision_function` in `LinearSVC` classifier, the relation between those two will be more clear! ...

`SVC(kernel='linear')` is better `LinearSVC` is better Doesn't matter Can someone explain when to use `LinearSVC` vs. `SVC(kernel='linear')`? It seems like `LinearSVC` is marginally better than ...

I have a file with an `.svc` extension. First question is what is a `.svc` file? The second question is how do I create one of these from the Visual Studio add item menu? I've tried all ...

A `.svc` file contains a WCF-specific processing directive (`@ServiceHost`) that allows the WCF hosting infrastructure to activate hosted services in response to incoming ...

`from sklearn.svm import SVC` The documentation is `sklearn.svm.SVC`. And when I choose this model, I'm mindful of the dataset size. Extracted: The fit time scales at least ...

We had a similar problem, and the `SVC` handler was already correctly installed. Our problem was the `ExtensionlessUrl` handler processing requests before they reached the `SVC` handler. To ...

The main difference between them is `linearsvc` lets you choose only linear classifier whereas `svc` let you choose from a variety of non-linear classifiers. however it is not ...

An `svc` file is for when you're hosting within IIS (it can now host without these in 4.0). Unless you have a reason to self host I'd strongly recommend sticking with IIS ...

From the documentation scikit-learn implements SVC, NuSVC and LinearSVC which are classes capable of performing multi-class classification on a dataset. By the other ...
