This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States.

In June 2024, Governor Hochul announced that the Commission had approved a new Energy Storage Roadmap for the state to achieve a nation-leading six gigawatts of ...

In 2020, 21% of the United States' electricity is sourced from renewable energy, primarily wind, an intermittent source of energy. As the U.S. increases the amount of electricity generated from ...

The NEC 2023 update provides essential guidelines for the safe installation and operation of Energy Storage Systems. From enhanced fire safety measures to specific ...

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

The PSC's subsequent 2024 Energy Storage Order approved the energy storage programs described in the Roadmap in order to achieve a total of 4,700 megawatts ("MWs") of ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload ...

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage
