How does 5G work on the Penang Bridge?

Once the 5G network is commercially launched, commuters on the Penang Bridge can enjoy smooth 4K video streaming, seamless short video browsing, immersive gaming, and high-definition live broadcasts. U Mobile said this breakthrough was made possible through Huawei's cutting-edge Meta Active Antenna Unit (MetaAAU) technology.

Does Malaysia have a 5G network?

Malaysian mobile network operator U Mobile has launched its 5G network. Significantly, the 5G network is the second in the country, rivaling the first built by the Digital Nasional Berhad (DNB) under the country's previous government.

Will U mobile's 5G trial pave the way in Malaysia?

As U Mobile moves closer to launching its 5G network, the success of this trial is expected to pave the way for improved connectivity and innovative services across Malaysia. U Mobile and Huawei achieved seamless 5G on Penang Bridge, with speeds averaging 597Mbps using advanced MetaAAU technology.

Will Malaysia introduce a second 5G network provider in 2023?

In May 2023, the Malaysian government announced plans to introduce a second 5G network provider, contingent on DNB reaching 80% population coverage. DNB met this milestone in December 2023, recording 80.2% coverage. This achievement paved the path for the government to award the second 5G network license to U Mobile.

In a recent trial, the company achieved over 120Mbps of seamless 5G network coverage along the entire 13.5-kilometre span of the first Penang Bridge using Huawei's Meta ...
