What is an uninterruptible power supply?

An Uninterruptible Power Supply is a battery backup(usually lithium-ion) which provides power to connected devices when their power source fails. Power failure can be a simple power outage or some other factor that might cause voltage to drop below the acceptable level. Some UPS devices are also designed to protect against power surges.

How does the s3k series uninterruptible power supply work?

The S3K Series uninterruptible power supply protects against most severe power disturbances including over/under voltages through state of art,line-interactive technology- most power disturbance corrections are accomplished without transferring to the internal battery.

What is a s3k uninterruptible power supply mini-tower?

The S3K uninterruptible power supply mini-tower is an economical choice for those applications requiring the performance of a sinewave output, line interactive UPS with the mini-tower shape for cabinet installations.
