The most powerful iron-chromium flow battery cell in the world had successfully come off the assembly line. On November 5, a research team under SPIC...

The "Ronghe No. 1" iron chromium liquid flow battery stack mass production line with independent intellectual property rights of the state power investment was put into operation.

SPIC independently developed the energy storage brand "Ronghe No. 1", and built energy storage demonstration power station in Zhangjiakou. Hydrogen energy brand ...

On February 28, my country's first megawatt-level iron-chromium flow battery energy storage demonstration project was successfully put into trial operation in Inner Mongolia and is about ...

Completed in early January, the project is composed of 34 domestically made "Ronghe 1" battery stacks and four groups of storage ...

Number one postnatal again initiate country experiment capacity battery system construction

After the project is put into operation, it will once again refresh the world's record for the largest proven capacity of iron-chromium flow battery energy storage systems.

Market Forecast By Type (Vanadium Redox Flow Battery, Zinc Bromine Flow Battery, Iron Flow Battery, Zinc Iron Flow Battery), By Storage (Compact, Large scale), By Application (Utilities, ...

On March 1, CCTV's "Morning News", "News Live Room" and "Global Today" reported in depth on the successful trial operation of the world's largest capacity iron-chromium

liquid flow ...

With ambitious goals to generate 40% of its electricity from renewables by 2030, the country is actively exploring long-duration energy storage solutions to stabilize solar and wind power ...

Completed in early January, the project is composed of 34 domestically made "Ronghe 1" battery stacks and four groups of storage tanks, making it the largest of its kind in ...
