Why should you choose a factory-direct solar panel manufacturer?

As a factory-direct manufacturer, we control every aspect of the production process, from the sourcing of materials to the assembly of the final product. This allows us to maintain strict quality control and ensure that every wholesale solar panel kit we produce meets the highest industry standards.

Why do you need a wholesale solar panel kit?

As a provider of solar solutions, offering wholesale solar panel kits allows you to cater to this increasing demand. By providing affordable, high-quality kits, you help your customers achieve their environmental and financial goals while establishing yourself as a trusted partner in the renewable energy space.

How much do solar panels cost?

Solar system prices vary, depending on the type of solar panels, manufacturer, cell size and wattage output. Our solar panels cost between \$300 to \$400 per panel, which is a competitive price considering the brands' top-tier quality and high standards. Some solar panels can run as high as \$600.

Do solar panels come with a warranty?

Most solar panels for sale come with a 25 year power output warranty so you can be sure your investment will last well into the future. We carry solar panels from major manufacturers including Mission Solar, Trina, Silfab, Panasonic and Qcells. Why invest in solar power?
