-----  
What is an emergency power off (EPO) button?

The emergency power off button, also called an EPO switch or EPO panel, is a safety measure for quickly disconnecting electrical power to a particular piece of equipment or facility in the event of an emergency.

When should you use emergency power off (EPO) with a UPS system?

Emergency Power Off (EPO) functionality enables an uninterruptible power supply and other related equipment such as generators to be remotely shut down in the event of a fire or building evacuation.

What is power continuity (EPO)?

Power Continuity |UPS System. WHAT ARE EPO OPERATIONS? EPO (Emergency Power Off): this feature on UPS systems can cause many problems to the smooth running of the power protection installation. Primarily, the feature enables the UPS system to be 'made safe' in the event of an emergency.

Do EPO systems slow down during an emergency?

During an emergency, every second matters. EPO systems are not a trivial issue when it comes to limiting the damages caused by fire. Accordingly, having the right system can speed up shutdowns and maintenance routines. By the same token, decentralized and inefficient systems slow you down during an emergency.

The emergency power off (EPO) switch is a device that allows you to quickly shut off electrical equipment during an emergency. An EPO ...
