An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails.

Uninterruptible power supply systems are indispensable tools, promising untold reliability and protecting the integrity of essential electrical equipment.

When it detects any anomalies, such as a power outage or a surge, it instantly switches to its internal battery power. Using a battery backup UPS offers several benefits. It protects your ...

An external bypass panel enables an Uninterruptible Power Supply (UPS) system to be electrically isolated for safe UPS system maintenance or unit replacement without any ...

What is an uninterruptible power supply system (UPS) and why do I need one? An uninterruptible power supply (UPS) is an electrical device that provides emergency power to connected ...
