What is the 5G map?

The 5G Map grew into a resource that included 233 providers with over 145,000 deployments in 142 countries. Now that 5G is so fully present in so many places, we're shifting our focus to other analyses, including spotlights on the latest emerging technologies and markets where connectivity is falling behind. Download the final 5G data.

Is 5G commercially open?

Indeed, it allows to follow the progressive deployment of 5G in the world, with always a notion of quality of associated coverage. However, it should be noted that certain areas where 5G has been detected are not necessarily commercially open. Indeed, beforehand, technical tests can be carried out by operators and their subcontractors.

How are 5G measurements done?

Regarding the collection of 5G measurements, it is done in the same way as for the previous technologies by our App users, with the difference that these users must of course be equipped with mobile and SIM card both 5G compatible... These measurements are therefore carried out in real conditions, directly in the field.

Discover 5G coverage in the world: dynamic map using real-time on-the-field measurements from real users
