How to show power plants in level Europe?

Press the wheel icon for settings and press the question mark icon for this text. Level Europe shows individual plants. The colors correspond to the energy source colors from the filter panel. Use the setting Choose how to show power plants to choose between equal circle size for all plants or circle sizes according to the plant capacity.

How do I show power plants in a region?

The pie chart indicates the number of plants per energy source in the region. Click a region to show the region's total energy capacity in the bar chart at the top of the filter panel. Use the setting Show power plants to show or hide individual plants on the map. Click the magnifying glass icon to show the search box and type a search string.

How does the EU support cross-border energy infrastructure projects?

The EU supports diverse and often cross-border energy infrastructure projects that produce, store, and distribute energy efficiently.

With expertise in the construction of some twenty high-voltage substations across Europe, Elys ensures the overall management of the design and implementation of greenfield projects, from ...

The map shows existing elements and those under construction: power plants, converters, substations and high-voltage cables/lines. PDF maps are available on our Grid Map ...

Europe's high smartphone penetration, ongoing 5G deployment, and increasing demand for reliable connectivity make it an attractive landscape for innovative signal ...

Description: Pre-built data of high-voltage transmission grid in Europe from OpenStreetMap. This dataset
