-----

Currently, the huge expenses of energy storage is a significant constraint on the economic viability of wind-solar integration. This paper aims to optimize the net profit of a wind ...

In this context, the optimal design of hybrid renewable energy systems (HRES) that combine solar, wind, and energy storage technologies is critical for achieving sustainable and ...

In this system, the ANFIS controller manages the microgrid's operation in grid-connected mode and islanded mode, ensuring that the system operates efficiently and reliably. The ANFIS ...

To address the inherent challenges of intermittent renewable energy generation, this paper proposes a comprehensive energy optimization strategy that integrates coordinated ...

In this study, the joint dispatch between double pumped storage power stations is used to accommodate wind and solar energy better and smooth their fluctuations on the grid.

The proposed control strategy minimizes energy exchange with the grid, reduces operation costs, and manages the overall system in four modes, i.e., islanded, grid-connected, ...

The remote village electrification along with the accessibility of continuous power is provided by the integrated operation of microgrid assisted by utility gri

To address the inherent challenges of intermittent renewable energy generation, this paper proposes a comprehensive energy ...

Micro grid reliability is ensured by the four flexible operating modes--grid integrated, standalone, effortless

shift from grid to islanded, and seamless movement between islanded to grid ...

To make full use of the electric power system based on energy storage in a wind-solar microgrid, it is necessary to optimize the configuration of energy storage to ensure the ...

In this study, the joint dispatch between double pumped storage power stations is used to accommodate wind and solar energy ...

Present of wind power is sporadically and cannot be utilized as the only fundamental load of energy sources. This paper proposes a wind-solar hybrid energy storage ...
