Solaron produces solar panels at its own modern production facilities located in Yerevan. To ensure the production of high-quality solar panels, the company has invested in a modern and ...

Overview Potential Photovoltaics Thermal solar See also External links According to the Ministry of Energy Infrastructures and Natural Resources of Armenia, Armenia has an average of about 1720 kilowatt hour (kWh) solar energy flow per square meter of horizontal surface annually and has a potential of 1000 MW power production. In the capital Yerevan, the average solar energy flux is equal to 1642 kWh/m². Armenia's area cannot be considered as homogeneous from the perspective of available solar energy: the difference between the amount...

Meet our new 60 KW #rooftop project installed on the #factory located in #Yerevan Installed capacity: 60.4 KW - System production: ~ 90 MWH/Year - Saved CO2 emissions: ~ 174.240 ...

Solaron produces solar panels at its own modern production facilities located in Yerevan. To ensure the production of high ...

Armenia's area cannot be considered as homogeneous from the perspective of available solar energy: the difference between the amount of solar energy reaching the ground in different ...

The Project at a Glance Last month, our technical team completed the commissioning of a 14kW solar storage system for a private residence in Yerevan, Armenia. This project focused on ...

The "EU4Yerevan: Solar Community" was put into the practical phase in 2020. Instead of 90 blocks of flats the photovoltaic stations were installed on the roofs of 97 buildings.

In contrast to the low-temperature solar devices, high-temperature solar systems achieve temperatures beyond

250 °C and can go up to 3000 °C or more by using ...

Solar panels and water heaters installation in Armenia. Find our charging stations in Yerevan for your Electric cars.

At the Platinum Stone factory operating in Yerevan, stones are cut by machines that run continuously. This is a highly energy-intensive process, as high-power equipment operates for ...

Meet our new 60 KW #rooftop project installed on the #factory located in #Yerevan Installed capacity: 60.4 KW - System production: ~ 90 ...

The "EU4Yerevan: Solar Community" was put into the practical phase in 2020. Instead of 90 blocks of flats the photovoltaic stations were installed ...

We installed solar stations in different regions of Armenia, including mountainous areas and near the radio stations and towers of our company "Radio Hay." The work was quite complex, but it ...

With an average temperature range between -2 °C and 28 °C and annual rainfall of approximately 500mm, Yerevan offers ample sunshine for most months with minimal disruptions from ...
